📍 Copenhagen, Denmark

SUMMARY

I am a skilled DevOps Engineer with 3+ years of hands-on experience and a total of 10 years of experience, an expert in Debian, RedHat, Unix & Windows OS with a strong development background.

My target is to master the DevSecOps culture, currently, I am focusing on applying GitOps, automate infrastructure to speed up the development and release process, Network, Security, and Cloud services.

My previous roles in the IT field started with providing level 1 and level 2 technical support as a System Administrator, troubleshooting, and maintenance of the technology infrastructure and systems for endpoint device management.

Then I became an IT Manager, which was more managerial level than technical, during this time I was preparing myself to be a DevOps engineer.

EXPERIENCE

DevOps Engineer

10/2021 - Present

PSQR (Copenhagen, Denmark)

- Applying GitOps
- Working with AWS, Digital Ocean & GCP
- Monitoring using Prometheus & Grafana
